

UX Testing + UI Iteration

	User Interface: How could the styling of elements be changed to make a more visually appealing, clear, and space efficient layout? (ex: sizes, colors, fonts, alignment, etc.)	User Experience: What elements of the user experience could be improved to make the puzzle more fun/satisfying? (ex: sounds, hover effects, etc.)
User 1 Name: Francisco C	<ul style="list-style-type: none">• “Dragon ball is better” than midpiece• The colors are vibrant and warm; nice choice of expressing that.	<ul style="list-style-type: none">• Improve the function where if you click on the other image all the others disappear instead of colliding with each other• Sound Collision• Some Functions appear not to be defined might wanna take a look at that
User 2 Name: Bailey D	<ul style="list-style-type: none">• “I like how the images stay aligned directly in the center and certain variations add a straightforward aspect that is manageable to work with”• “The overall layout is alright, there could be different background variations and image backgrounds for the 4 divs on the right”	<ul style="list-style-type: none">• Fix the unidentified image; it’s making the website look mediocre• Sound Collision
User 3 Name: Chase C	<ul style="list-style-type: none">• “Change the Background to more of a picture instead of colors”• “Try to fix the sizes for the logos if possible”	<ul style="list-style-type: none">• Please remove whatever that nonrecognizable image out it’s looking funky• Fix Image collision
User 4 Name: LHS Student Red	<ul style="list-style-type: none">• “That’s crazy!! Maybe the color layout could be slightly different but, that works!”	<ul style="list-style-type: none">• Improve the sound functions since one tends to override the author and have a feature to pause• Can you add a clicking sound?

User 5 Name:*LHS Student* **Blue**

- “YOO! This is sick, not really into the colors; but the alignments and how everything is intact is cool!”
- “Add a picture background as the wallpaper?”

- Add a feature where if you click on the straw hats it changes from the cartoon version to the life action
- Gotta improve on the image collision it’s in the way

UI Before Feedback (Screenshot / GIF)*What trends did you identify in your feedback?*
